8 important things you should know about PPE

1. The employer must provide PPE (personal protective equipment). Don't let employees bring their own PPE from home unless you have inspected it !
2. Use the right PPE for the job!
3. Inspect & Maintain your PPE ! Store it properly.
4. The cost of an eyeball is priceless! PPE is cheap.
5. If you engineer a control, you may not need PPE.
6. Metal hardhats are illegal in construction.
7. PPE only works when you wear it. If your glasses are hanging on your neck, they won't save your eyes!
8. PPE can protect you from dangerous chemicals, dusts, fumes, flying particles and sharp edges.
